Project Access-Collin County

The mission of Project Access-Collin County (PACC) is to improve the health of our community by creating access to health care and coordinating necessary resource referrals and other basic services for those most in need through education and empowerment. PACC services include access to routine and preventative healthcare, diagnostics, specialty care, medications, health education, interpretation services, transportation support and coordinating and teaching clients to access other necessary resources to overcome the barriers to good health and prosperity.

Our organization encourages clients to create goals of good health and self-sufficiency. Each PACC patient is provided access to a medical home, specialty care, ancillary/diagnostic services and medicines. We provide a bridge for the uninsured working poor to connect to the appropriate resources that will provide a long-term plan for personal health and success. Since our inception in 2011, Project Access-Collin County has provided these services to over 1,097 Collin County residents.
